Virtual Dj Skins 1366x768

Unboxing: VirtualDJ VDJ 2.1. On my screen the main menu is displayed in 1366x768, but when i press play the screen does not fit and the whole screen is cut off. Why is this happening? A: You have to fix the main menu's resolution first. Look up your main menu.jpg to see how it should be designed. You should see one of these: If it looks like the image above, then you should adjust the X and Y positions of it's centre to the 0,0 coordinates of your main menu. You can do this by editing your main.vmf file, which is found in your VirtualDJskins folder. If it looks like the image above, then you should check if your main menu has a resolution of 1366x768. If it does, then change it to that resolution in your skins.cfg file. Look in your skins.cfg file to see which resolution you need to change. If it looks like the image above, then the resolution should be 1366x768. If it is not, then change it to 1366x768. I haven't changed my resolution to 1366x768 because my main menu is 16:9. So if you want to be like me, then change your main menu to be 16:9. Look up your main menu to see how it should be designed. You should see one of these: Then you should adjust the X and Y positions of it's centre to the 0,0 coordinates of your main menu. The X and Y positions are in the lines like this: And the x and y properties are in the lines like this: And also in the lines like this: If it looks like the image above, then you should change your main menu to be 16:9. If you can't find your main menu,
