Generally, a home or an office has a multimedia network infrastructure that includes a home computer, a personal computer, a printer, a scanner, a digital camera, a camcorder, and the like, and uses a digital multimedia signal such as a digital video signal, a digital audio signal, or a digital multimedia file. In the conventional multimedia network infrastructure, a user may use the functions of multimedia data in the connected multimedia device by connecting the multimedia device to the network. The conventional multimedia network infrastructure has a problem of inconvenience that a user should search and select the function of the connected device from the main menu of the multimedia device when a multimedia device is connected to the network. Particularly, a user should check the status of the connected device when a trouble occurs in the connected device. Two months after Italy's constitutional court ruled that constitutional changes made by the government were unconstitutional, the government has a plan to revise the Electoral Law, according to Reuters. Under the planned changes, lawmakers who are elected in Italian-held areas would be able to vote and serve in the Italian parliament from constituencies outside of Italy. According to the Associated Press, the Italian government is expected to present a bill during the European Union's upcoming parliamentary session in March that would allow lawmakers to live and work in Italian-held regions without automatic citizenship. ADVERTISEMENT Prime Minister Matteo Renzi's coalition government struck a deal with the country's two largest political parties in February to extend the government's term for six months. The deal was viewed as a compromise that could lead to the creation of a new center-right coalition. According to Reuters, one of the conditions that the government and the center-right would agree to is opening up the Italian parliament to a portion of the Italian electorate, including lawmakers who live outside of Italy. Last month, the
