Windows 10 Microsoft has added a new feature called Timeline that will help you keep an overview of all your social and email conversations in one place, including messages sent to you. How to turn on Timeline? In the top right-hand corner of your screen, tap on the three-bar menu, and then select Settings. Scroll down to the bottom of the Settings screen, and then tap on More. Tap on Apps & features. If you already have the latest version of Timeline, this setting will not appear. If you don't have it yet, tap on the Get it now option, and then follow the onscreen instructions. Once you turn on Timeline, the three bars at the top of your screen will get filled with your timeline, as shown in the below image: If you don't want Timeline to be included in your Outlook, you can disable it by going to the same screen, and tapping on Settings, then apps and features. Scroll down to find and tap on Apps & features, then tap on Turn features off. How to find deleted items in your Outlook mail? This feature is supposed to help you keep track of all the deleted emails, and the deleted items from your Outlook. In Outlook, click on the File menu in the top menu bar, and select Search. I have problem with jquery, I don't know why it doesn't work. if I use this code `$("#deleteButt").click(function(){ alert("Text1"); var myId= "";` `$.post("script.php",{id:myId}, function(data){ alert(data); }); });` it doesn't work. But if I change this code `$("#myId").click(function(){ alert("Text1"); var myId= ""; $.post("script.php",{id:myId}, function(data){ alert(data); }); });` it works. I don't know why. If I use this code `$("#"+""+""+"Text1"+"Text2").insertBefore(".popup");` It works fine. Can you please explain this to me? A: You could do this `$( "a" ).click(function() { var myId = $(this).attr('id'); $.post("script.php", { id: myId }, function (data) { alert(data); }); });` or this `$( "a.delete" ).click(function() { var myId = this.id; $.post("script.php", { id: myId }, function (data) { 77a5ca646e`

Q: How to add a new field to an existing table using python? I want to add an additional field to an existing table in a DB using Python. A: I think what you want to do is this: 

```
import sqlite3
conn = sqlite3.connect('database.db')
c = conn.cursor()
c.execute("CREATE TABLE new_table (id INTEGER, name TEXT, name2 TEXT)")
c.execute("INSERT INTO new_table VALUES (1, 'Apple', 'Red')")
c.execute("INSERT INTO new_table VALUES (2
```
