**RANKIT Free 2022 [New]**

**Download**

RANKIT is a tool that you can use to verify the search engine rankings of your website. It provides you with a simple and easy to use solution for managing your SEO campaigns. The program provides support

---

for some of the most used search engines: Google, Yahoo, Bing and Yandex and allows you to perform direct or API based searches, which comes in handy for SEO companies. To get more precise results, you can select language and country specific search

---

engines. Getting acquainted with the ribbon-based interface is easy and the usage shouldn't pose any problems, even to beginners, as creating a new project is just a matter of pressing a few 'Next' buttons. You have to input the website name, enter the

---

keywords you want to search for, choose the search engines and let the program do the rest. The keyword list can be entered manually by the user or imported from a text file in your computer. The user can set the number of search threads and set the

---

time delay between two consecutive requests. For each entered keyword, the application displays the URL and the rank of every search engine you selected. High rankings are colored in green, while the red color suggests a low position in the search results. The

---

project history can be saved to your computer for later reference by exporting the results to XLS or CSV format. Furthermore, you can send complete reports to your customers via e-mail. Proxy support and selective ranking checking are other advantages that

---

this application comes with. RANKIT is a tool that you can use to verify the search engine rankings of your website. It provides you with a simple and easy to use solution for managing your SEO campaigns. The program provides support for some of the most used
