Magic Mirror Sync is an easy-to-use and smart tool that allows you to synchronize and backup your data between any destination folder and your computer. No matter if you want to synchronize another folder from your computer or a network drive, it has all you need. All you need to do is just click on the Synchronize button and the application does the job for you. What's quite interesting is that Magic Mirror Sync comes with a simple and clean interface that does not require you to perform any advanced configurations. So, it's very easy to use and it takes just a few seconds to perform a complete backup and synchronization process. There are a lot of tabs where you can monitor the backup and synchronization progress. The interface is quite intuitive and does not require any advanced knowledge of computers. While the application supports USB 2.0, this is not mandatory. However, if you have USB 3.0 or FireWire ports, you will benefit from a faster backup and synchronization process. Magic Mirror Sync is a reliable tool and it's available for Windows XP, Vista, 7 and 8 operating systems. What's interesting is that it synchronizes and backs up your data from different directories. Also, you can select as many folders as you want to synchronize. More interesting is that Magic Mirror Sync will perform a complete synchronization and backup with each change that is performed in the source folder. So, if you have already synchronized the application for the first time, you have to be sure that the destination folder does not contain any files with the same name. While performing the synchronization, you have the possibility to set as many folders in the destination as you want to synchronize. So, you can keep the destination folder clean and leave it untouched or be the only user available in your network and share your backup folder with the other users. On the other hand, Magic Mirror Sync keeps track of all the synchronization status and error logs. It displays the last backup and synchronization report, so you will not forget about any of the changes that are performed during the process. You can have all the logs available in a dedicated tab. Moreover, you can keep the last backup if you want. Pros: Very easy to use Free Great interface Highly stable Cons: Hard to set up Not compatible with SSD Hard to restore the backup file Rating: Mirror Magic is a software application which allows you to synchronize different files
