Windows with AutoCAD AutoCAD LT, initially developed by the Autodesk Technical Software staff to meet the requirements of the U.S. Navy's Oceanographer's Experiment, was introduced to the public in May 1999. Its capabilities were so impressive that Autodesk agreed to develop a fully featured, standalone version of AutoCAD, to be called AutoCAD LT. The new software became available in October 2001 as AutoCAD LT for Windows, and in January 2002 for Macintosh. In 2005, Autodesk acquired Autodesk UGS, a company that specialized in true global navigation (TGN). Autodesk completed a complete re-write of AutoCAD LT's terrain engine, and introduced a new utility called AutoCAD LT Navigation for rendering locations in the TGN system. This technology incorporates OpenGL into AutoCAD LT for Windows and is used as the base for the AutoCAD LT Terrain plugin for AutoCAD. In July 2007, Autodesk acquired Schrodinger, Inc. The Schrodinger group was incorporated into the AutoCAD LT team, and the new group continued to develop functionality in AutoCAD LT, and now is called AutoCAD LT Labs. AutoCAD LT '08 (November 2008) was a major release with many new features. It is based on the X32 release from 2007. In 2009, AutoCAD LT '09 (December 2009) was released based on the X32R release from 2008. AutoCAD LT '10 (December 2010) was based on the X32R2 release from 2008. AutoCAD LT '11 (December 2011) was based on the X32R3 release from 2008. AutoCAD LT '12 (January 2012) was based on the X32R4 release from 2009. AutoCAD LT '13 (December 2013) was based on the X32R5 release from 2010. AutoCAD LT '14 (December 2014) was based on the X32R6 release from 2011. AutoCAD LT '15 (December 2015) was based on the X32R7 release from 2012. AutoCAD LT for the Mac In February 2008, Autodesk released AutoCAD LT for the Mac. It is based on the .NET Framework and Visual Studio 2008, and is intended to work in conjunction with AutoCAD LT for Windows.
